Your letter dated 8th June 2004 – File Reference G40703

Dear Sir,

My mother gave me your letter to read and I now respond for her and myself to those orders. There is nothing wrong with my mother and she is capable of managing her own affairs. This application has been brought for improper purposes, is designed to continue the harassment of my mother, are an abuse of the processes of the Tribunal, are frivolous and without merit.

As a Registrar of a court/tribunal you should know that orders are law. The facts in those orders are law and fact. To say the orders made on 26th March 2004 are incorrect is to legally make a false statement. We have received the written orders and we accept them.

The verbal orders made on the day were improper and were repaired. On that day the Tribunal chair, Robert Scott, conducted a sham hearing and thought we were dumb enough to go along with it. Well those verbal orders were totally improper and were appealable to the Supreme Court, which we were prepared to do and this is why they were corrected. It is improper to write to a NeuroPsychologist to get her to change her report. It is improper to order that the applicants can provide a geriatrician with the necessary information so they can prejudice the outcome of his investigation. In fact I believe you are acting corruptly in that you are trying to improperly influence my mother into doing that which she does not need to, does not agree to and are not in her best interests.

So I invite you to have another hearing and bring down those orders so we can get this matter into the Supreme Court. I personally believe your Tribunal is corrupt and I have been told by Faye Johnson that she has a friend high up in that tribunal. Not only this but an attempt was made to cause us surprise by holding back our mail, sending mail to 2 Flett Street, knowing mail to that address goes missing. In fact the documentation we were entitled to and was sent to us by express post never arrived. Yes your tribunal is a sham and highly suspect and I believe corrupt.

Yours sincerely
